CYCLAMEN

The Original Wandsbeker Strain of Cyclamen

S toldt's Cyclamen Splendens Gigantea Hybrids are known all over the world. They are unsurpassed in size and delicate form of flowers, genuine colors, thickset of growth and abundant in flowering. There is no better strain of seed to be had at any price. Our numerous customers who have been growing their fine Cyclamen plants from the seed supplied by us can verify our assertion. Do not be tempted by cheap offers. Inferior seed is expensive in the end. We handle but one grade of seed—and that the very best.

New crop as they arrive

BULBS

Cold Storage through the year

FOR SUMMER and FALL PLANTING

It is not possible yet to fix definite prices on most bulbs, but we solicit your order for same, subject to your approval of price to be advised as soon as fixed. We assure you that, as in the past, our prices will be as reasonable as possible for FIRST QUALITY stock—the only kind we aim to handle.

As we buy from the best foreign and domestic growers, in quantity, we can supply quality stock at prices as reasonable as the market permits.

Dutch Bulbs

Hyacinths, Narcissus, Tulips
in all sizes, best standard varieties; a complete list with prices will be ready shortly. Write for same.

French Bulbs

**Paperwhite Narcissus and
Soleil d'Or (Yellow)**

The price of these desirable bulbs, while not yet firm, will, we are glad to say, be no higher, possibly lower than last year; in fact, will be such as to enable you to grow them at a profit.

They will be definitely fixed shortly and we will be glad to have you write us.

New Crop Lilies

HARRISII

Selected grown especially for us

5-7, 400 per case..... }

HERE ARE A FEW OF THE NUMEROUS LETTERS FROM OUR CUSTOMERS WHICH SPEAK FOR THEMSELVES

"Please book our order again for Lilies. These Lilies we got from you last year are wonderful at this time and will be in good shape for Easter."

GRAHAM & VAN RY
(Camden, N. Y.)

"I wish to thank you for the fine bulbs you always send me."

PAUL M. HALBROOKS,
(Newark, Ohio.)

"You may ship at once additional Freesias as per our wire. We have found that your Bulbs start much more vigorously than others we have planted, and we want you to know how well pleased we are with the service you have rendered in this order."

L. C. STROH & SONS,
(Batavia, N. Y.)

THE KNICKERBOCKER GARDENS
NORFOLK, VIRGINIA

"Up to the present time, all bulbs I received from you that I have forced have been A No. 1, giving best results of any bulbs grown in Norfolk."

(Signed) FRED BOWNE, Mgr.

"My flowers were extra fine from bulbs gotten from you all last year."

Yours truly,
(Signed) MRS. C. C. SHARP,
1414 3rd St.
Winston-Salem, No. Carolina.

GENERAL PERSHING.

The highly popular bronze pink..... 22.50
Following are the descriptions of the new giant flowering colored Freesias which were placed on the market for the first time last year.

CALIFORNIA.

A large flower of a bright golden yellow, extra fine, strong growth and long stems. One of the very finest yellow Freesias.

CARMENCITA.

A beautiful light orange-salmon hue with buff shading on the lower petals. Long, wiry stems.

AURORA.

A large flowering yellow, suffused with orange, a variety that has many admirers.

CARRIE BUDAU.

Lavender-pink, a great improvement over Gen. Pershing, larger flowers and heavier stems, an enormous grower and producer.

ILENA.

Deep rosy lavender with white throat; deep orange blotch on lower petal and good stiff stems. Flowers large and very attractive.

JUNE MICHELSEN.

Large flowering, deep rose-pink with light blush throat, three lower petals are veined purplish-crimson with a deep yellow blotch on center petal. Good, stiff stems and strong constitution. A variety of special merit. \$40.00 per 1000.

OLIVETTE.

Bright carmine red with light yellow throat, lower petals having a deep yellow blotch with crimson veins. Very profuse bloomer.

Prices on the above, except where noted, \$35.00 per 1000.

NIKOTEEN

SOLD BY

S. S. SKIDELSKY & CO.

53 PARK PLACE

NEW YORK, N. Y.

Nikoteen Liquid is a Strong Solution of Nicotine, and is Used for Fumigation or Spraying.

Fumigation. Fumigation is preferred for greenhouses and conservatories because it is the least troublesome and most convenient. It consists in vaporizing the Nikoteen so that the house is filled with the fumes. The vaporizing is usually done by painting on steam pipes, or by blowing live steam through a solution containing Nikoteen.

Economy in vaporizing is obtained by impregnating the air in the house sufficiently to kill all insects with the smallest consumption of **Nikoteen**. Quick volatilization, by which all the Nikoteen is thrown into the air at once, is therefore most economical.

Directions for Spraying. Outdoors,

For most outdoor work and sometimes under glass, spraying is resorted to in preference to fumigating. One part of Nikoteen to 500 parts of water is a sufficiently strong spraying solution for most insects. For applying the spray a force pump sprayer or syringe is preferable.

Among the insects especially susceptible to nicotine poisoning are the Aphis, or Plant Louse, Thrip, Apple Aphis, Black Peach Aphis, Currant Leaf Hopper, Grape Vine Leaf Hopper, Rose Leaf Hopper and Melon Louse.

What Nikoteen Aphis Punk Is And How To Use It.

Aphis Punk is composed principally of nicotine, wood pulp and chemicals that, when the sheets are ignited in use, assist and control the burning of the pulp and the vaporizing of the nicotine.

Aphis Punk is packed in cases containing 12 air-tight cans; each can contains 12 **thick** sheets, 6 inches wide by **about 33 inches long**.

Every florist will soon find the best way to use the punk in his own peculiar conditions.

To light the punk, unroll a sheet completely, then coil loosely by reversing the sheets and rolling it up in such a way as to leave a small air space between the turns. Light thoroughly at the lower end and allow it to burn **without flaming**.

The sheets should be placed equal distances apart and at low points in the house, as the fumes rise. The house should be tightly closed during the fumigation and for two or three hours afterward.

Value of Humidity.

To get economical results—that is, to kill all the insects with the smallest consumption of Nikoteen—it is necessary that the atmosphere in the house should be moist. Nicotine poisons certain insects by being absorbed through the skin. A moist surface absorbs nicotine more readily and rapidly than a dry surface, consequently the insects are more susceptible to the poison when they are moist than when dry. The more humid the air in the house to be fumigated the less Aphis Punk will be required to do the work effectively.

When
DY-SECT
meets
INSECT,
INSECT stands no show

DY-SECT

means destruction
for every pest that pesters you
on every kind of vegetation
indoors or outdoors

It is one of the famous "Horn" products
and is sold by

S.S. SKIDELSKY

53 Park Place

New York.

CURCULIO
ETC., ETC.

Bottomless Pit

Your Enemies

Surely, you know those enemies of yours: the Rose Bug, the Green Fly, the Red Spider, and most of the others.

You know what destroyers of beauty and utility they are, that they work outdoors and indoors, that they are the despair of many.

So we need not describe them, but can get right down to the meat of this message and say that—

You Can Destroy Them

You can, because at last there has been compounded an insecticide which possesses the utmost of effectiveness—and its name is DY-SECT.

It is an insecticide which unfailingly kills off your insect enemies, not excepting even the Rose Bug and other hard-bodied insects, which have such great resistance to extermination that many people have considered it well-nigh impossible.

DY-SECT is Guaranteed

Being a product of the Horn Laboratories, you can depend upon it that DY-SECT was not put on the market until years of experimentation had proven its remarkable effectiveness.

We know this so well that we will cheerfully refund the purchase price if it fails. But of course, being a "contact" insecticide, it must be used according to directions. Even DY-SECT can not kill what it doesn't reach; but it does kill every bug, egg, larva or grub it moistens.

Dilution Makes Price Low

The price per gallon means nothing in itself. DY-SECT could be made half as concentrated and sold at much less. But you will readily see that you would gain nothing by that. The number of gallons of **killing** spray you get for your money—that's what counts.

Think of it, DY-SECT is so powerful that even for the Rose Bug, harder to kill than any other, it is diluted to 1 in 30! Which means low cost per killing-power.

Its Use Will Convince

No matter what you have tried, no matter what other means may have failed or fallen short of giving satisfaction, we respectfully urge you to give DY-SECT a good trial. Spray thoroughly, and often during the breeding-season, as directed on each can, and you will be most happy about the results.

And the next season you will be less troubled, and will need still less DY-SECT.

Furthermore, when your plants are not weakened by being bug-eaten they are stronger, healthier, bear more, larger and more beautiful blooms, and better resist the winter frosts. So you gain in **every way**.

But we need not go into fine details in this simple folder. DY-SECT will speak better for itself than a bookful of words could.

Others Found That True

Naturally, many of those who at last found, in DY-SECT, a really effective insecticide, went out of their way to write us about it.

Thus the Naperville (Ill.) Nurseries called it "perfectly satisfactory," and Mr. Dan Usher, former Chief Gardener of the Panama Canal Zone, wrote: "DY-SECT is entirely satisfactory and more than meets all your claims."

However, testimonials read so much alike that when you have read one you've just about read them all; so we will not bore you with more. And anyway, your own experience is worth more than that of all other people together.

Have a Happy Experience

Below are the prices of DY-SECT, and don't forget that it is diluted thirty times and more, so that you get a **greater** effectiveness at a **smaller** cost per gallon sprayed on the flowers and plants it saves from your insect enemies.

Gallon.....	\$6.00	Quart.....	\$1.75

STRONG, 2-YEAR-OLD FIELD-GROWN, FOR FALL, 1924, DELIVERY; XX GRADE FOR FORCING

BABY RAMBLERS: Crimson Baby, Ellen Poulsen, Erna Teschen-dorf, Mad. Cutbush, Orleans, Red Orleans, Jessie.

HYBRID TEAS: Columbia, Crusader, Mad. Butterfly, Ophelia, Premier, White Ophelia.

HYBRID PERPETUALS: Captain Hayward, Frau Karl Druschki, Gen. Jacqueminot, George Arends, Mad. Gabriel Luizet, Magna Charta, Mrs. J. H. Laing, Paul Neyron, J. B. Clark.

RAMBLERS or CLIMBERS: American Pillar, Dorothy Perkins, Excelsa, Roserie, Tausendschoen, White Dorothy, Hiawatha.

Prices on these will be made shortly and gladly quoted on application.

Prices on both standard varieties and novelties of the past season's introduction will appear in due time in our Midwinter and Spring list. We might mention in passing that our stock invariably comes from the most reliable sources. No mildew, club root or any other Rose affections go with plants ordered through us.

New Roses

RED PREMIER FOR 1925

Originated by Robert Scott & Son

A red sport of Premier. Color, bright cardinal-red. Very brilliant under electric light. The bud is pointed and a much better form than Premier. The flower is very fragrant. Dark green foliage and stronger grower than parent, and for Winter forcing better than Premier. This Rose is destined to become the most popular forcing Rose.

Prices to be quoted later in the season.

NEW CARNATIONS

"Betty Lou"

(BAUR-STEINKAMP & CO.)

Introducer's description. Awarded Gold Medal at the National Flower Show at Cleveland, March, 1924. It propagates easily. It makes fine plants in the field. It has health and vigor. It transplants readily. It blooms freely. The stems are of good length and always strong. The bloom is large and well formed. The calyx never splits. The bloom opens freely at all seasons and does not show sleepy in warm weather. The color is a pleasing shade of medium pink, spread evenly over the entire flower. It does not come off-colored or streaked in dark weather.

\$15.00 per 100; \$125.00 per 1000.

"Spectrum"

(F. DORNER & SONS CO.)

A magnificent scarlet; large, vigorous and free. \$15.00 per 100, \$125.00 per 1000.

"Gypsy"

(FRED SCHRAMM)

A meritorious red Carnation, of splendid keeping qualities, having a record of 18 to 20 blooms per plant. Very popular in the Chicago market.

\$12.00 per 100, \$100.00 per 1000.

"Cheerful"

(HAUSMANN BROS. & SON)

Introducer's description: New York Flower Show, Silver Medal; Cleveland Flower Show, Silver Medal.

A continuous and free blooming dark pink Carnation. It is a wonderful keeper, no splits, a fine-shaped flower and a very satisfactory Carnation to take the place of Mrs. C. W. Ward.

\$15.00 per 100, \$125.00 per 1000.

Last Season's Introductions:

Gold Medal Carnation

Winsome

(Hartje & Elder).

\$11.00 per 100, \$100.00 per 1000.

Pink Matchless

(James Wheeler)

A sport of the well known White Matchless.

\$8.00 per 100, \$75.00 per 1000.

Both of the above are too well known to require detailed descriptions.

FIELD GROWN PLANTS OF ALL VARIETIES
